PROFESSIONAL SUMMARY

.NET Developer with 3 years of experience in designing, developing, and deploying web applications using **C#, ASP.NET MVC, .NET Core, LINQ, Entity Framework, SQL Server**, and modern front-end technologies. Strong in API development, debugging, performance optimization, and Agile methodology. Proven ability to collaborate with cross-functional teams and deliver scalable solutions.

- PROFESSIONAL EXPERIENCE:
- Designed and consumed **RESTful APIs** for multiple business modules.
- Built reusable components using **Entity Framework & LINQ** to optimize data access.
- Improved application performance by implementing **caching and asynchronous programming**.
- Created complex **stored procedures, triggers, and views** in SQL Server.
- Implemented **JWT & Identity Framework** for secure user authentication.
- Worked on **microservices-based architecture** using .NET Core.
- Integrated third-party APIs such as **payment gateways, SMS, and emailservices**.
- Collaborated with QA team to fix bugs and deliver stable releases.
- Used **Azure DevOps** for CI/CD pipelines, version control, and automated deployments.
- Built responsive UI using **HTML, CSS, Bootstrap, jQuery**, and JavaScript.
- Developed dynamic front-end components using **Angular (v12)** with 1.3 years of hands-on experience.
- Optimized slow SQL queries, reducing load time significantly.
- Applied **SOLID principles** and best coding practices across projects.
- Performed **code reviews** and contributed to continuous improvement.
- Implemented **exception handling & logging** using Serilog / NLog.
- Worked in **Agile (Scrum)** environment, attending daily stand-ups and sprint planning.
- Used **Postman** for API testing and automated test scenarios.
- Deployed applications on **IIS** and monitored logs to ensure uptime.
- Collaborated with cross-functional teams (UI/UX, QA, Product) for requirement gathering.
- Documented technical specifications, API contracts, and release notes.

TECHNICAL SKILLS

Languages: C#, SQL, JavaScript, TypeScript

Frameworks: ASP.NET MVC, .NET Core, Web API, Entity Framework, Microservices

Frontend: HTML, CSS, Bootstrap, jQuery, Angular (v12)

Database: SQL Server, MySQL

Tools & DevOps: Git, GitHub/GitLab, Postman, Azure DevOps, IIS

Concepts: OOP, Microservices, REST APIs, Design Patterns, Agile/Scrum

PROFESSIONAL EXPERIENCE

.NET Developer

codereach software and education private limited, Mumbai | *Oct 2022 – Present*

Key Responsibilities:

- Developed and maintained web apps using **ASP.NET MVC, .NET Core, C#, EF Core, SQL Server**.
- Designed and consumed **RESTful APIs** for internal and external integrations.
- Implemented user authentication using **Identity Framework & JWT**.
- Optimized database queries, improving API response time by **30%**.
- Worked with **Azure DevOps** for CI/CD pipelines and version control.
- Collaborated with QA team to fix bugs and enhance performance.

PROJECTS

1. Underwriting Automation Platform– .NET Core Web API

- Role: Backend Developer
- Built complete API layer using **.NET Core 6, EF Core, SQL Server**.
- Implemented JWT authentication and role-based authorization.
- Designed and consumed **RESTful APIs** for multiple business modules.
- Built reusable components using **Entity Framework & LINQ** to optimize data access.
- Improved application performance by implementing **caching and asynchronous programming**.
- Created complex **stored procedures, triggers, and views** in SQL Server.
- Implemented **JWT & Identity Framework** for secure user authentication.
- Worked on **microservices-based architecture** using .NET Core.
- Integrated third-party APIs such as **payment gateways, SMS, and email services**.
